Surely the most common way of coding a message is in choosing the most appropriate words for the listener or reader. In the case of Hamlet, he did not like what he read that described it elementary, as simple words that end in nym describe the classes of words. Some of the most frequently used Nym words are synonymous (meaning the same as); antonimo (indicates the opposite of); the same sound of the same sound of the same as); and hetero means â€ œDifferent.†"Therefore, if there are homonims, it is about to reason that there are homonims, it is about to reason that there are homonims, it is about to reason that there are homonims, it is about to reason that there are homonims, it is about to reason that there are homonims, it is about to reason that there are homonims, it is about to reason that there are homonims, it is about to reason that there are homonims. Fogna, therefore, is an etheronim. But the No words end here. One of the websites I visited recently 2 lists no less than 26 nym words, many of which are quite arcane and of interest to relatively few. Some are definitely fun. Do we really need a word to mean another word of two identical parts? If yes, then tutu, pawpaw, yo-yo, and hello are the tatuonimi. A couple of weeks back, my son asked me what you mean by a mestonym. I don't know, so we watched him. In retrospective, I should have been able to logic out, as â € comments change. A metonym is a word that designates something from a word that is associated with it. For example, Hollywood is a metonym used to indicate the United States film industry, while the crown refers to the regality, and the bottle refers to alcohol. My use of the "a bit of ink" expression a couple of paragraphs back is also a metonym for written communication, even when it is not involved real ink or writing on paper. The point of all this has to do precisely in the use of our language. You will not be able to encode a message using a word like metonym, or heteronimo, or tautonym, unless I'm certain that my listeners (or readers) know his meaning. Or this, or I am ready to add the definition in the first place. However, learning the correct use of words, however arcane, can be useful, and if you like the words themselves, even fun. What is your idioletto? In the book of him Half life of the facts: because everything we know has a expiry date, Samuel Arbesman3 discusses the changes in the language that occur over time, and the two fields that see this phenomenon differently. He explains the prescriptive grammars like those who focus on the way in which words should be used, and descriptive grammars like those who are more interested in the way they are actually used. Arbesman states that every individual develops his set of rules on how to use words, and that all of us, you and all others, we have our personal idioletto. This delightful term describes our unique language and our speech model, as determined by what we have learned when we were young, as well as those around us, and includes our grammar, vocabulary, word pronunciation, and also Our accent. There is an important lesson here. If we really want to communicate effectively, we need to be aware that every time we encourage a message, someone whose idioletto is significantly different from ours can most likely decode it so as to obtain a completely different message. So you pay to be careful about our choice of words; It's really a message, or just â € œParole, words, wordsâ €? Â © 2013 Ken Michaels. All rights reserved.
